SOUTHERN KANSAS ARBITRATION.

The Missouri Pacific and St. Louis yesterday scored the the first decisive victory in the contest at Chicago for the equitable basing of rates to Southern Kansas territory. The Missouri Paclfic and Frisco demanded that Fort Scott territory as well as Wichita should be taken into considera-tion by the arbitrators, and a prompt adjournment of the vroceedings was the re-sult, the Chicago lines for the first time giving an open indication of their position

by asserting that the Missour Pacific had made this demand in order to disrupt the pool, which it would do as the Nettleton interest would not, and in fact either a novice in railway and transportation matters or he takes the people of Kantasas City to be very verdant. The Santa Fe the St. Louis lines however was a veritable bomb, wholly unlooked for and a com-

> the Missouri Pacific would find its position untenable, even were it to succeed. As the case progresses, however, the be-lief that the St. Louis idea will prevail is strengthened, and there is little doubt as to the ultimate result of the controversy. The Missouri Pacific and Frisco have not gone into this contest to lose, and all indications point to a victorious conclusion.

THE EYES OF THE SOUTH OPENED.

One of the leading generals of the rebel army, in writing of the war says; "If we of the south had known how powerful and rich the north was in manufacturing as well as commerce and how your millions of workingmen were trained mechanics, competent on the instant to rebuild any thing from a bridge to a railroad, and had known how your people by their thrift and skill accumulated hundreds of millions of surplus carnings to loan to the Gov-ernment in times of war we should never have appealed to war. We learned at bitter cost in mortal conflict how

in a condition to be crushed and defeated in war. Your great wealth, your millions of trained mechanics, able to act as inc-chanics and soldiers both, were what surplus in money, and no skilled labor. Your savings banks and your skilled labor were what whipped the rebellion, and prostates with their manufacturing and their wealth are constant marvels to all southerners traveling through
